

Mehmetcan Bozkuş

Junior Software Engineer

👤 Profile

Hello, I'm Mehmetcan. I've been actively working on projects in Java, Python, and C languages. I'm always focused on enhancing my skills in these domains and excited about delving into new programming languages, platforms, and fields. Looking forward to exploring more!

💼 Internships

Software Engineer Intern at Turkcell, Hibrit

August 2023 — Present

During my Turkcell internship with the Cloud Backup team, I focused on Python development for Veeam Backup & Replication REST API functionalities. **One of my key contributions was implementing an automated email system for specific customers in Turkcell Bulut.** This involved scripting, email template creation, and logging to enhance the customer experience.

★ Projects

Bank Automation System - Java/Swing

Spell Checker App - Java/Swing

Stock Control System - Java/Swing

ChatGPT CLI Client - Python

...

🎓 Education

Fatih Sultan Mehmet University, Istanbul

September 2021 — September 2025

Ecole 42, Istanbul

March 2023 — Present
